PetFound AI

OWNER PHOTO GUIDE

Good photos help PetFound AI recognise your pet. Please use genuine photographs of your own pet.

1 Register your pet

- Go to petfoundai.com, create an account and choose Register Pet.
- Enter your pet’s details. Use one registration per pet.
- Upload 5 to 8 clear photographs, following the examples below.

Never upload another owner’s pet without permission. No people in the photos, especially children, and only one animal in each photo.

2 Take these photographs

Register with 5 to 8 photos, ideally taken on more than one day. Start with the six views below.

Front face

Both eyes visible

Left side

Show left markings

Right side

Show right markings

Full body: front

Head, chest and legs

Full body: rear

Back, tail and coat

Extra angles

Looking up, down or resting

These pictures are examples of the views to capture. Your photos must show your own pet.

Photo tips

✓ Natural light ✓ Sharp focus ✓ Pet at eye level ✓ One pet per photo ✓ Different days and settings

Avoid blurry or dark pictures, filters, stickers, screenshots, obstructed faces, people in the frame, other animals, and repeated near-identical shots.

Privacy: Photos are used to find matches. They are not used to train the model unless you tick the optional box for your pet, and no photos are used for training yet. To see, correct or delete your information, email hello@petfoundai.com. The Privacy link at the bottom of every PetFound AI page has the details.
